“Native American Cultural Significance of an Eclipse”

October 13 – Friday

11.00 – 12 (Noon).

Dr. Paul Slaboch

“NASA – High Altitude Balloon Launch and its impact on understanding Eclipse.”

Chair, and Associate Professor & Director, Aerospace Engineering Program Mechanical, Aerospace, & Acoustical Engineering, University of Hartford

We are inviting all Faculty, Staff and Students with their family and friends to attend these events. Most activities will be located at the S and T building.

Please be culturally aware that in some Native cultures we have restrictions on the viewing of the eclipse.

October 14 – Saturday

8.00-8.45

High Altitude Balloon Launch

Quad Area between buildings

8:30 -12:30

SIPI Eclipse Event

· Activities for Kids

· Food and Snacks

· Solar Telescope

· High Altitude Balloon Video – Live Stream

9:13

Eclipse will begin.

10:36

Eclipse will PEAK for 4 minutes and **48 seconds.** The Moon will cover most of the sun. Only a small ring of the Sun will still be visible; this is usually called the “RING of FIRE.”

12.09

Eclipse will be over.
